

PROTECTION FROM EVERY ANGLE ON EVERY FRONT

Keep valued team members better protected with head gear technology that takes safety to the next level. The Hunter Hard Hat, created in conjunction with Velotec, is a **Type 2, Class C bucket hard hat** that's engineered for improved impact results, sized to fit 90% of the population — and customizable to suit your company's unique safety accessory needs.

Each hard hat features the embedded Mips® technology, a first-of-its-kind approach for industrial head gear. A low-friction layer within the hard hat, Mips® considerably improves head protection by mimicking the way a brain moves upon impact. Paired with a full range of accessories, the Hunter Hard Hat is a safer, more customized approach to keeping crews protected **on every front.**

Hunter Hard Hat with Mips® Technology

DESIGNED FOR ANGLED IMPACTS

ADJUSTABLE ONE-SIZE-FITS-MOST BUILD

LIGHTWEIGHT, SPORTY DESIGN

ENHANCED RANGE OF VISION

27 ACCESSORY OPTIONS

COMPANY BRANDING AVAILABLE

Mips® Technology: Head Safety Game Changer

While most hard hats are engineered to protect against straight-on impacts, they don't take into account more common (and dangerous) angled impacts which can result in concussions and other traumatic brain injuries (TBI). The Hunter Hard Hat works by acting in the same way the human brain does when a fall or impact takes place.

Low-friction interior layer moves slightly upon impact

Dangerous angled force is redirected away from the head

Reduced rotational motion safeguards against head injury

Safety Gear Made Custom

Hunter's goal has always been to deliver tailored solutions that serve companies' unique operational and safety needs. The Hunter Hard Hat is no different.

Using a click-mount technology, a wide range of accessories can be applied to our hard hats, offering the ability to customize your crew's headwear for any task, temperature or element. With more than 27 options available, and new accessories always under development, it's all about ensuring your gear delivers.

WRAP YOUR HEAD AROUND THIS

Sources: Brainline, Headway, National Safety Council

Most industrial and construction workers are at risk of life-changing head injuries, but few take adequate precautions against them. That can result in devastating impacts for worker and company alike.

30%

Traumatic brain injury (TBI) plays a major role in approximately 30% of U.S. injury deaths each year, and 25% of construction fatalities.

20%

20% of workplace injuries are head-related, although only 3% of PPE purchases are for products that protect the head.

\$94K

Injuries involving the head or central nervous system are the costliest lost-time workers' compensation claims, coming in at \$93,942 per incident.
